Relationships: -

One Patient can have 0..* Appointments.

- Each Appointment belongs to 1 Patient.

- One Doctor can have 0..*

Appointments. - Each Appointment belongs to 1 Doctor.

Business Rules:

1. A patient may book several appointments. 2. Each appointment is between one patient and one doctor.

Example Patient Record: PatientID: 101 Name: Maha Phone: 0551234567 DOB: 12/05/2000

Why Speciality is an attribute: Speciality describes the Doctor and does not need its own independent records in this scenario.

Exercise 2

because the phone number is unstable can be change any time
